

Regional Health Hospital

Patient ID: P875309

Date: 25-09-2024 to 29-09-2024

Attending Physician: Dr. Robert Miller

Primary Diagnosis: Coronary Artery Disease

Tests Conducted:

Tests Conducted on 25-09-2024:

- Pulmonary Function Test (\$90)
- Blood Glucose Test (\$40)
- Urinalysis (\$45)

Tests Conducted on 26-09-2024:

- ECG (\$175)
- Lipid Panel (\$85)
- Chest X-Ray (\$200)

Tests Conducted on 27-09-2024:

- Echocardiogram (\$350)
- Blood Pressure Monitoring (\$50)
- Stress Test (\$250)

Tests Conducted on 28-09-2024:

- Kidney Function Test (\$85)
- Lipid Panel (\$85)
- Echocardiogram (\$350)

Cost Breakdown:

- Initial Consultation: \$190

- Pulmonary Function Test: \$90
- Blood Glucose Test: \$40
- Urinalysis: \$45
- ECG: \$175
- Lipid Panel (x2): \$170
- Chest X-Ray: \$200
- Echocardiogram (x2): \$700
- Blood Pressure Monitoring: \$50
- Stress Test: \$250
- Kidney Function Test: \$85

Total Cost: \$1560

Notes:

Initial tests such as pulmonary function were unnecessary for diagnosing coronary artery disease. The later tests, such as the stress test, lipid panel, and echocardiogram, were more relevant to the condition.
